Andreas Schlößl

Full-Stack Developer & DevOps Engineer

schloessl.andreas@gmail.com · schloessl.dev · linkedin.com/in/andreas-schloessl · github.com/aydreas

Vienna, Austria · German (native) · English (full professional)

Profile

Software engineer with 6+ years spanning full-stack web development, DevOps, and systems administration. Track record of leading CI/CD initiatives, architecting resilient on-prem and cloud infrastructure, and delivering production web applications across TypeScript, Java, and modern frontend ecosystems. Creator and maintainer of Logigator – an open-source digital-logic simulator featured in *c't* magazine and adopted by German informatics schoolbooks.

Experience

Independent IT Consultant & Developer · *Self-Employed* — Oct 2025 – Present

- Deliver freelance software development and IT consulting, specialising in modern web applications, infrastructure automation, and DevOps tooling.

Full-Stack Engineer ➜ DevOps Technical Lead · *Bitberry GmbH* — Sep 2021 – Oct 2025

- Delivered end-to-end production web applications in TypeScript, Angular, Vue/Nuxt, React, NestJS, and Java Spring, working closely with clients and product teams.
- Led refactoring initiatives that raised code quality through stronger type-safety, linting, and expanded test coverage.
- *Promoted to DevOps Technical Lead (Apr 2023):* designed and maintained CI/CD pipelines (GitHub Actions) across multiple product teams, and architected development and production infrastructure on Docker, Kubernetes, Azure, and Proxmox – enforcing automated quality gates and standardising deployment workflows across the engineering organisation.

IT Administrator · *NAVAX Consulting GmbH* — Aug 2018 – Dec 2020

- Administered hybrid Windows, Linux, and Microsoft 365 environments, maintaining uptime and security for internal users.
- Developed internal tooling in C# / .NET and Java Spring that streamlined server management and reduced manual operational overhead for the IT team.

Selected Projects

Logigator · logigator.com · github.com/logigator/logigator

- Open-source browser-based designer and simulator for digital logic circuits, combining a WebGL editor with a high-performance C++ simulation engine and hierarchical circuit blocks.
- Featured in *c't* magazine (issue 15/2024) and adopted by German secondary-school informatics textbooks as a teaching tool.
- *Stack:* TypeScript, Angular, Node.js, C/C++, MySQL, Redis, Docker & Kubernetes, GitHub Actions.

Self-Hosted Homelab · Production-grade private infrastructure

- Operate a 2-node high-availability Proxmox cluster (QDevice quorum, replication, automated failover) with 400+ TB ZFS/LVM storage, 3-2-1 encrypted offsite backups, VLAN-segmented OPNsense networking, and Kubernetes clusters serving private and public workloads – fully provisioned with Ansible, cloud-init, and Grafana/InfluxDB monitoring.

Education

B.Sc. Computer Science · *TU Wien – Vienna University of Technology* — 2021 – 2025

Matura, Information Technology · *HTL Rennweg* — 2015 – 2020

Technical Skills

Languages	TypeScript, JavaScript, Java, C/C++, C#, PHP, Bash
Frontend	Angular, Vue.js / Nuxt, React / Next.js, Svelte
Backend & APIs	Node.js, NestJS, Java Spring, .NET / ASP.NET, GraphQL
DevOps & Cloud	Docker, Kubernetes, Azure, GitHub Actions, Ansible, Proxmox, Prometheus / Grafana
Data & Systems	PostgreSQL, MySQL, MongoDB, Redis, InfluxDB, Linux, ZFS, OPNsense, Active Directory
